**What Jimmy Kimmel Needs to Know**

Last week, Jimmy Kimmel told an emotional story about the birth of his newborn son, who had to have emergency heart surgery. He claimed that babies with pre-existing conditions born to uninsured women before Obamacare might die due to being denied care.

Here are a few facts: First, millions of people have been uninsured for decades. What hospital left babies to die? Second, the hospital baby Kimmel was born at is a private charity hospital providing millions in charity care. Third, Obamacare makes insurance unaffordable, leading to more uninsured people. And fourth, only 115,000 people signed up for the temporary Obamacare program for people with pre-existing conditions.

“Five Things You Need to Know About The Hospital Where Jimmy Kimmel Took His Son, And Why It's Not A Case For Obamacare,” Aaron Bandler, Daily Wire, May 2, 2017.
