**CCHF Project Expose the Baby DNA Secret**

Our organization, CCH Freedom, has started a research project notifying parents of newborns that Minnesota is storing and using their child’s DNA for genetic research. We mailed them the official state opt-out form to see how many parents would opt out when actually told about the storage and use. The baby’s DNA had been taken at birth for newborn genetic screening and then kept.

But a month after our recent February mailing to parents, the MN Senate introduced language to shut down our access to longstanding public birth data, which we had used to mail the form. Clearly liberals don’t want parents to know what the state is doing to their babies. We have three more months of parents to mail. To donate to this project, go to CCHFREEDOM.ORG
