Are You Ready For 24:7 Body Tracking?

Everyone should get a copy of Margaret Hu’s report called “Biometric ID Cybersurveillance.”

It discusses how the 9/11 terrorist attacks are driving us into a surveillance society. She talks about driver’s licenses embedded with radio frequency identification technology, and Congressional proposals to require a digitalized biometric identification card which could lead to biometric databases with the digital photos, fingerprints, iris scans and DNA of all citizens and non-citizens.

Merged with GPS technology we could find ourselves under 24/7 body tracking. Every moment, every minute, every movement in a database. The report is online.

Presented daily by Twila Brase, President, Citizens’ Council for Health Freedom.

The Health Freedom Minute is now heard in 40 states: Mornings M-Th at AM1280 (The Patriot) in MN and 91.5 AM WHKC (FreedomFM) in OH, afternoons on American Family Radio, and daily on the Bott Radio Network.
