Cures Act Requires Access to Entire Patient Record

Yesterday I said the U.S. House Energy and Commerce Committee will vote on the 21st Century Cures Act this week. I said the bill will allow countless corporations and government agencies into your medical records without your consent to analyze you, your family and your doctors.

The bill would also require every company that sells electronic health records to be able to transfer and allow access to “the entirety” of the patient’s data or face fines in 2018. This is how corporations and government agencies will get all your data - electronically. Tell the Committee to protect your privacy and vote no on the 21st Century Cures Act.
