Federal Takeover Center Under Construction

Government health insurance exchanges are key to Obamacare. Last week, the federal government met for a three-day system-wide meeting with state officials from every state regarding the establishment of Obama’s exchanges. Three days. All funded by your tax dollars. This is in addition to the $1 billion dollars divvied out in federal exchange grants to states.

Exchanges will be under federal control. The feds are building a “data services hub,” a clearinghouse for tax, citizenship and other federal data to be shared between the states and the federal government. The hub will be used to run every exchange…and to monitor whether you have complied with the individual mandate to buy insurance. These are clearly federal takeover centers.
