**Value vs Volume Rationing Plan**

One of my jobs is to reveal hidden agendas in Big Government rhetoric. For example, the word “value.” Obamacare supporters want your doctors to be paid on value, not volume.

A new report says two-thirds of doctors will be paid based on value in five years. In other words, reformers don’t want to pay your doctor for services provided but only for services the reformers deem valuable. This may even include providing fewer services or reporting your private data to the government.

Imagine trying to get your plumber to accept payment according to how you value his service. Don’t accept Big Government’s value vs. volume argument. This is just another way to ration health care and control doctors.

Presented daily by Twila Brase, President, Citizens’ Council for Health Freedom.
