States can Stop Obamacare

Welcome to this week’s fourth broadcast on the Obamacare ruling. When Roberts ruled the penalty to be a “tax,” the 2,700 pages of the federal takeover of health care were allowed to advance.

State governors and legislators are now key to stopping Obamacare. They must not implement any part of the law.

Like Florida Governor Rick Scott, they must refuse to conform state law to federal law. Like Louisiana Governor Bobby Jindal, they must refuse to install the Obamacare superstructure, the government health insurance exchange. The exchange is the federal takeover center for Obamacare. Contact your governor, legislators and political candidates.
