Nevada AFL-CIO Condemns Obamacare

The Nevada AFL-CIO labor union has passed a resolution condemning Obamacare. They say the law will destroy union health plans and could shut down unions. One problem is the provision that requires employers to offer insurance only to employees that work 30 hours or more.

Because employers are reducing hours, some union workers won’t have to be offered insurance. This will leave them with less income and more costly plans that aren’t union-backed. One union leader said, “We were told that if you like the health insurance you had, then it would be left alone. Well, it hasn’t been left alone.” Unions are only now figuring out how they were used by Obama.
