Educate Your Neighbors on Exchange

Most people have no idea what Obama’s health insurance exchange is. That must change. And I need your help. The exchange has been called the heart of health care reform. Any state that installs a state exchange installs the centerpiece of Obamacare. Every exchange is under federal control.

Exchanges are federal takeover centers that will force people into Medicaid. They will also be used to track and enforce compliance with the Obamacare mandate to purchase health insurance. The IRS has a direct line into every exchange. It will be used to bring universal coverage to America. Please educate your neighbor. Refuse the exchange and you’ll stop Obamacare.
