Where Will They Get the Money

Obamacare will cost over $1 trillion dollars. To pay for it, there are 21 new or expanded taxes and a ½ trillion dollar cut to Medicare. And 15 bureaucrats will cut payments to doctors. The law also assumes a 31% cut on physician pay will go into effect. But Congress has refused to make this cut for 10 years.

The CBO said repealing the cut to doctors would add nearly three hundred billion dollars to our deficit. If it doesn’t happen, Obamacare becomes that much more expensive. And what if some taxes, like the 40% tax on expensive health plans, never happens pushing the cost of the law one hundred seventeen billion dollars higher? Who will pay for Obamacare?
