HIPAA Tool for Drs.

HIPAA does not protect privacy. Now our organization, Citizens’ Council for Health Freedom, has issued a document you can use to refuse signing the HIPAA form. We use the federal government as back up. Your signature cannot be required. You can refuse.

We have also created wallet-sized HIPAA information cards that we’re happy to send for a donation of any kind. You can just carry it in your wallet and hand it to the clerk. Go to cchfreedom.org and email us or use the GIVE FEEDBACK button on our home page to request a copy of the document or your own set of 15 wallet-sized cards. That’s cchfreedom.org
