Obama Goes Dark on Obamacare Enrollment

Our organization, Citizens’ Council for Health Freedom has issued two press releases asking for the Obama administration to reveal the current enrollment status of Obamacare – one in June and one in August. Now two U.S. Senators have asked the administration to reveal current enrollment. We know at least 2.6 million enrollees have data discrepancies, so they may all be ineligible. Colorado alone expects 24% of their enrollees to drop coverage.

Obama’s team doesn’t want to discuss any number lower than 8 million so they’ve gone dark. But I think their silence says there are no longer 8 million people enrolled in Obamacare.

“Colorado exchange expects more to drop coverage.” Arthur Kane, The Denver Post, July 8, 2014.
