Obamacare Failure #2 Mandate

Shortly before July 4th, the administration used a blog to announce Obamacare implementation failure #2 -- a one year delay of the employer mandate. This is illegal. The President cannot decide to simply set aside a law until it’s politically convenient. But that’s not all.

This may be Obama’s strategy to drive people into Obamacare exchanges. Without employer coverage, millions will be forced to get government exchange coverage or go uninsured and pay a penalty. The exchange is key to imposing Obamacare, but it needs lots of healthy people for financial stability. This is the perfect ploy to drive them in. Get, share and post our “Refuse to Enroll” flier.

“We’re Listening to Businesses about the Health Care Law,” Valerie Jarrett, The White House Blog, July 2, 2013, 6:00 p.m. EDT.
