Terrified Doctor; Suffering Patients

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

Dr. Eric Nussbaum wrote in Monday’s Star Tribune a commentary titled, “Don’t take health care for granted.” As Chair of the National Brain Aneurysm Center, he says we may be facing the collapse of the greatest health care system in the world—which will cause suffering for his patients.

As a physician, it terrifies him because someone other than the doctor and the patient will decide what care is unnecessary.

Chiding Dr. Virginia Dale whose recent article supports health care rationing to cut costs, he concludes, “If one is unfortunate enough to be seated in a car as it drives off a cliff, it is only the fool who does so happily, content in the knowledge of saving money on gas all the way down.”
