Tax Credits Increase Dependence on Obama

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

The President promised tax credits for those who need them. These subsidies for lower and middle income earners are one of the “most expensive and controversial provisions” in the bill.

They are also a very bad idea. The fact that insurance will be partially or fully paid by a third-party, the government, guarantees higher prices for insurance premiums. Second, these subsidies are entitlement programs meant to increase lower and middle class dependence on the Obama administration.

Third, the subsidies are meant to coerce states into building the Administration’s ‘command and control’ infrastructure, the health insurance exchange. The only place citizens can obtain this subsidy is in a state-established federal Exchange. State legislatures must ignore the subsidies and say no to the Trojan Horse Exchange.
