The Obamacare Exchange Threat

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

The American Health Benefit Exchange is a huge threat to health freedom. The Exchange is required by Obamacare. States are required to establish the Exchange or the federal government will establish it for them. Whether the feds could or would do this and how is not known, and Obamacare lawsuits abound. Yet many States are moving toward implementation.

This is a very bad idea. The Exchange is the command and control center of Obamacare. A former Deputy Attorney General under Reagan has said that the Exchange is anti-market, enforcement without federal fingerprints, and nationalization-in-fact. In short, the Exchange will impose national health care. States must say no.
