Beware State Health Insurance Exchange

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

The Health Insurance Exchange is considered the most important aspect of the federal law. It is President Obama’s command and control infrastructure. Yet your Republican or Democrat leaders may actually be planning to set it up.

If they do, the state-based Exchange will be used to impose federal controls over your health care. The Heartland Institute has just published a report called, “State Insurance Exchanges: The Case Against Implementation.”

The author warns there is no protection for states against future federal decisions. He says setting up an exchange is an unconstitutional collaboration that undercuts nationwide court cases. He advises states to reject false offers of flexibility, recognize the weakness of federal threats and responsibly refuse to implement Obama’s law.
