Medical Doctors Shun TSA Airport Scanners

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

Have you flown recently? Did you avoid the TSA scanner? If so, did you get the pat-down?

Dr. Dong Kim, the neurosurgeon who treated Rep. Gabrielle Gifford’s gunshot wounds gets the pat-down. He says, “There is really no absolutely safe dose of radiation. Each exposure is additive, and there is no need to incur any extra radiation when there is an alternative.”

Dr. Len Lichtenfeld at the American Cancer Society told CNN, “This is a total body scan…Total body radiation is not something I find very comforting based on my medical knowledge.”

Note: to avoid undue roughness, get the pat-down out in the open where TSA staff must be mindful of those watching and listening.
