Sickle Cell Anemia Cured. Why is Nobody Talking About It?

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

Did you know that Adult Stem Cells have cured Sickle Cell Anemia? The National Institutes of Health reported in 2009 that, “A modified blood adult stem-cell transplant regimen has effectively reversed sickle cell disease in 9 of 10 adults who had been severely affected by the disease,…”

This is exciting news. So why doesn’t the American Sickle Cell Anemia Association shout it from its website? They don’t even mention it in their treatment section. The Mayo Clinic website says there’s “no cure for most people with sickle cell anemia.” Yet I just watched a youtube about Joseph, a child cured by adult stem cells and free from disease for seven years. Why is nobody talking about this? Is it because this is a strike against embryonic stem cells?

Send me a comment or a question at healthfreedomminute.net.

“Sickle Cell Anemia Cured by Adult Stem Cells,” TALCommunications, YouTube (4:37 minutes), March 24, 2009

The Health Freedom Minute is now heard in 37 states: Mornings M-Th at AM1280 (The Patriot) in MN and 91.5 AM WHKC (FreedomFM) in OH and afternoons on American Family Radio.
