2. Unique Investment Identifier (UII): 009-000267387

Section B: Investment Detail

1. Briefly describe the investment's purpose, goals, and current or anticipated benefits (quantitative and/or qualitative). Include the investment's specific contribution to mission delivery or agency management support functions and identify key customers, stakeholders, and other beneficiaries.

The CMS Center for Consumer Information and Insurance Oversight (CCIIO) IT Data Management Investment funds a data warehouse solution that supports multiple Office of Information Systems (OIS) CCIIO programs and acts as the perpetual central repository for capturing, aggregating, and analyzing information on health insurance coverage. Current and historical data will be used to monitor, forecast, trend, analyze and report on the new information that the Affordable Care Act authorizes federal agencies to collect. The data warehouse is formally known as Multidimensional Insurance Data Analytics System (MIDAS) and is built on industry leading analytics, data warehousing and business intelligence (BI) technologies to ensure ease of maintenance and deployment. The MIDAS solution will provide mission-critical functionality that CCIIO requires to implement and enforce new statutory requirements for issuers. In order to complete and sustain the various tasks mandated by the new health care laws, CCIIO must create an analytics system that is capable of supporting and informing these enterprise functions. IT Data Management Investment fulfills key provisions of the Patient Protection and Affordable Care Act (ACA) and aligns with HHS Strategic Goal: Transform Health Care.

2. Briefly describe how the investment contributes to the agency target EA and its role in the Enterprise Roadmap. Include a description of how the investment includes or will achieve programmatic or technical innovation.

This investment is included in the agency's target Enterprise Architecture and is part of a

planned, but not yet initiated, Enterprise Roadmap.

 Provide the investment's currently projected return on investment (ROI) percentage, as documented in the most recent alternatives analysis, and the date that it was established.
