¹ States that have extended retention for positive results (from 10 yrs to indefinitely) as of 2018.

² The Minnesota Department of Health was required to destroy all samples collected prior to August 1, 2014.

³ Unless requested for research, blood spots are stored for 90 days and must be destroyed within 30 days of the expiration of the 90 day period.

⁴ In February 2008, the NNSIS showed Texas retention as 6 mo. in 2005, 2006, 2007, and 2008. On March 12, 2009, the Texas Civil Rights Project sued the Texas Department of Health after a newspaper in Austin, Texas reported that the Texas Department of Health has been keeping newborn blood indefinitely for the past six years. On March 20, 2009 there was no retention data from 2005 – 2009.

⁵ Blood spots received: before 5/27/2009 were destroyed | 5/27/2009 - 5/31/2012 kept indefinitely | 6/1/2012 or later kept 2 years.
