Find Treatment for Long Covid

Do you have Long Covid? The U.S. Department of Health and Human Services has a new Office of Long Covid Research and Practice and \$1.15 billion from taxpayers for Long Covid research. So far, at least \$1 billion has been used only to observe people, not develop treatments for them. We shouldn't be surprised. Government caused Long Covid by restricting access to ivermectin.

While government dithers and clueless clinics tell patients to go home and rest, real doctors, such as those at FLCCC.net, are treating Long Covid patients successfully. If you or someone you love is suffering, go to FLCCC.net, watch the videos, review treatment protocols, and find a doctor who will work to give you your life back. Get an appointment sooner, not later. Yes, sooner.
