How Are Iowa and Canada Alike?

How are Iowa and Canada alike? This is how. The Iowa legislature has been advancing a bill to build a centralized database of the medical records of all Iowans. They called it the Health Data Utility - a name meant to hide its real purpose. We found out about this very bad bill when an Iowa legislator called us for help. We opposed it in a letter to Iowa Governor Kim Reynolds. As of now, the bill appears to be dead, as it should be.

Meanwhile, Canada is planning to create a national public health surveillance system that taps into the medical records of all Canadians. They want to use electronic health records to do primary care research using comprehensive patient data including vaccinations and doctor's notes, likely without patient consent. Let's stop the surveillance!
