Elon Warns Against DEI in Medical Schools

The DEI agenda is not about diversity, equity or inclusion. It is the dumbing down of America and the subjugation of excellence.

Elon Musk told CNN that if the standards for passing medical exams and becoming a doctor are lowered, it is more likely that mistakes will be made.

Dr. Stanley Goldfarb, chair of Do No Harm, told a congressional subcommittee that "DEI is dangerous everywhere but it's most dangerous in medical schools." He said, "doctors are being taught to discriminate by race, not treat patients equally." Ultimately, he said, "your future doctor is being trained to be an activist."

CCHF is building a parallel system of health freedom to maintain medical excellence. Find it at **JointheWedge.com**.
