Should We Fear Bird Flu?

Government and mainstream media should counter doomsday claims about the bird flu. The CDC says bird flu rarely infects humans. The risk is “very, very low.” But FirstPost claims that there have been 873 cases of bird flu in humans in 20 years with 458 dying.

A Texas man diagnosed with bird flu had one symptom: eye redness. Dr. Meryl Nass says no Americans have ever died of bird flu. But a pharmaceutical consultant clearly schooled in fearmongering said, and I quote, “This appears to be 100 times worse than COVID – or it could be if it mutates and maintains its high case fatality rate.” News sources reported his outrageous claim. Why? Why would they do that?

“Bird flu pandemic could be ‘100 times worse’ than COVID, scientists warn,” Melissa Koenig, New York Post, April 4, 2024: <https://bit.ly/3w08Cjg>

“Bird Flu Virus Infections in Humans,” CDC, last reviewed April 11, 2024: <https://bit.ly/3Q9mLBk>

“Bird Flu Outbreak ‘100 Times Worse’ Than Covid Pandemic say Experts,” Vantage with Palki Sharma, Firstpost, April 5, 2024: <https://bit.ly/3Q4KsuP>

“Slides from my webinar tonight on how the WHO intends to proliferate biological weapons,” Meryl Nass, April 14, 2024: <https://bit.ly/3JppDX6>
