Big Brother Biometric Scans Tied to Vax Passports

Biometrics. Get to know the word and what it means. Biometric systems scan faces, fingerprints, palmprints, eyeballs, voices, and even the way you walk to verify your identity. This means the biometrics are stored in a government database.

African countries have started to require biometrics be used to conduct regular business and life transactions like opening a bank account, purchasing property, driving, receiving medical care, filing taxes and many other activities. The biometrics can also be tied to a vaccination record.

Biometrics are coming to America in a very big way, with the REAL ID, airport security cameras, and cameras in your neighborhood. Will you refuse to comply with the collecting and cataloging of the coordinates of your body?

“Biometric Scans Now Being Tied to Vaccination Status,” Sean Miller, The Vigilant Fox, May 23, 2025:
