Will You Play 'Russian Roulette' With the Covid Shot?

Rasmussen Reports says 56 percent of Americans believe side effects from the Covid-19 shot likely caused many unexplained deaths. In fact, 64 percent of black voters and 57 percent of Hispanic voters suspect they caused death. Forty-two percent believe CDC officials should be fired for misleading the public.

Meanwhile a step-by-step evaluation of the Covid shot challenges the assertion that it saved millions of lives. Methodological flaws, misrepresentation of findings, and suppression of dissenting voices caused this "fragile assertion" to become a widely accepted belief. As the Covid shot is pushed, will you decide to play Russian roulette or abstain?
