

REAL ID – 6 FACTS

REAL ID is a Federal ID card for a national surveillance system.

1. **CAN EXPAND:** By law, required uses for the REAL ID can expand beyond flying (e.g. medical care, gun purchases, college, bank accounts, car rental).
2. **REMOTE ACCESS:** DMVs plan to digitize the REAL ID, put it on your phone, and have remote access to it (*AAMVA testimony to Congress, 12/5/2023*).
3. **BIOMETRICS:** Government has claimed a right to collect and catalog the coordinates of your body for its own control, starting with your facial geometry.
4. **CHINA-LIKE:** REAL ID establishes the framework for a biometric-controlled, digitized 'social credit system' in America.
5. **DOMESTIC PASSPORT:** Unlike passport books or global entry cards, REAL ID could become an internal or domestic passport for all transactions, access, and movement in the U.S.
6. **NATIONAL DATABASE:** State DMVs use a federally funded State to State (S2S) SPEXS system, a distributive database that shares a list of data on each citizen without consent.

Americans have the power to stop REAL ID.
