Nearly 10K Die in Two Days After Covid Shot

More and more truth is coming out on the Covid shot. An investigation of the deaths reported after Covid vaccination found 38,472 deaths. 9,252 of them happened within 1 to 2 days of the shot. Some in less than 24 hours.

Yet those deaths were ignored as circumstantial, unrelated, or as conspiracy thinking. The shots impacted even millions more still today. No doubt, those Americans who refused these shots do not regret opting out of Covid's Russian roulette.

In good news, the U.S. Supreme Court sent the case brought by Amish parents against New York's covid shot mandate back to the appeals court for reconsideration.

"INFURIATING: The VAERS system shows 38,472 deaths reported associated with Covid vaccine....9,252 of those deaths occurred on the DAY of vaccination, or within," Florida's Voice (video of U.S. Senator Ron Johnson), FACEBOOK, December 9, 2025:
