## What on Earth is “Bureaucrat Birx” Up To?

Dr. Deborah Birx, the scarf-laden leader of Trump’s White House Coronavirus Task Force, wants public health data as available as the weather forecast.

She wants all patient data available for analysis and public reporting. She wants Medicare to mandate that patients cannot leave the clinic or emergency room with any vague diagnosis like “gastroenteritis.” She wants every patient with a definitive diagnosis. To send their patients home, doctors would have to do unnecessary tests or tell a lie.

Dr. Birx told people to get the Covid shot and later admitted she knew it would not work. The last thing America needs is a **public health dashboard** that bureaucrats like Dr. Birx can use to keep the public scared and on edge all year long.

**“Public health data should be as available as the weather forecast,”**
