## Japanese Database Links Covid Shots with Deaths

It's been more than five years since the first Covid injection but data on its impact keeps coming. Japanese doctors want mRNA vaccine manufacturing stopped based on a growing database of harms.

The database holds more than 43 million vaccination records and more than 500,000 death records. Analysis finds deaths peaked 90 to 120 days after vaccination. In one numbered lot, 164 people have died, 108 of them within one year of injection. In another lot, the deadliest of all, only 15 injections were given, but 10 people have died. Covid was a lesson in government power. Teach it to your children lest history forgotten is repeated.

**“UPDATE: Japanese database now links 42 million COVID-19 Vaccine Batches to 500,000 Deaths,”** Tess Lawrie, MBBCH, PhD, A Better Way with Dr. Tess Lawrie (substack), January 12, 2026:
