## Do Not Give Up Your Biometric Privacy Rights

When it comes to health care, Republican administrations are often no better than Democrat administrations.

President Trump is in office, but the push to get us all into a digital ID controlled by the federal government through biometrics is being pushed as hard as ever.

Now, Dr. Oz, handpicked by Trump, wants to use your phone, your face, and a QR code to let you share your medical records at the point of care. They intend to use biometrics and QR codes to “kill the clipboard.” As a reminder, nearly everyone and their mother can have access to your medical records without your consent because of HIPAA. This initiative is a biometric data grab. Soon it’ll be your fingerprint, your iris scan, and then your DNA. Don’t give up your biometric privacy rights. Say no.

**“CMS aims to modernize patient data access in US with QR codes, biometrics,”** Lu-Hai Liang, Biometric Update, March 23, 2026:
