Official Covid Shot Injury List Coming . . .

As authorized under the federal compensation program, HHS will create a “COVID-19 Countermeasures Injury Table” to document the injuries from so-called “countermeasures” used during the Covid pandemic. These countermeasures include the Covid shot, remdesivir, mechanical ventilation, and more.

The Table will “list and explain injuries that, based on compelling, reliable, valid, medical and scientific evidence, are presumed to be caused” by these Covid interventions. Those who don’t want to acknowledge deaths, permanent disabilities, and more call it speculative. But the Table will officially document the injuries suffered too often in silence as shown on the OpenVaers website and as documented by the injured on social media since 2021.
