## Home Invasion by Medicare AI Agents?

Dr. Oz, the head of Medicare, supports public-private-patient partnerships, which would endanger freedom, especially when patient data is used by government and private corporations to manipulate patient lives.

Dr. Oz also wants to give agentic AI tools to every Medicare recipient. He says, the tool would talk to you, remind you about your premiums or a drug you didn't pick up or that your doctor is trying to reach you. It could give you meal plans, tell you to buy a cheaper drug, or give you a pep talk.

The battle for health, he says, will be in your kitchen, living room, and bedroom. He said, "Let me give you advice there." This would be a home invasion. We told Trump not to pick Dr. Oz. The reasons become more clear every day.
